Work Experience

Persistent Systems Pvt. Ltd., Bangalore - Senior Architect

Jan 2023 - Present

Key Responsibilities:

- Managed a geographically distributed engineering team to deliver high-scale SaaS solutions in an Agile environment, ensuring operational excellence and product alignment with strategic goals.
- Revamped the payment portal to integrate with our new REST API, streamlining the payment workflows, reduced latency, and increased payment accuracy.
- Architected and scaled distributed systems using .NET and cloud-native technologies (AWS) to handle high-volume transactions with 99% availability targets.
- Defining and implementing technical vision, standards, and best practices to guide engineering teams and ensure alignment with business objectives.

Key Achievements:

- Reduced payment transaction time, increase the payment accuracy and decrease the latency through revamped payment portal.
- Led a team of developers in delivering a mission-critical payments services application, which improved operational efficiency by 20%.

SAP Ariba, Bangalore

Senior Technology Specialist

Jan 2011 – Jul 2022

Key Responsibilities:

- Built and maintained technical roadmaps that converged business goals with technology innovation, conducting architecture analysis and product roadmap creation to drive business success.
- Directed a team of engineers in the development and implementation of cutting-edge software solutions, leveraging technical expertise and leadership skills to drive project success and deliver high-quality results.
- **Implemented a** streamlined data model for customer and partner data, contacts, and products, enabling enhanced CRM capabilities within SAP CRM system.
- **End-to-end offshore** delivery management.

Key Achievements:

- Achieved > 40% increase in business productivity through seamless integrations between SAP CRM, ERPs, JIRA and Ariba Products.

I have also worked at HealthAsyst and ThoughtFocus in a Lead Programmer role from 2005 to 2010.
